## SUPPLY AND EXHAUST VENTILATION TO ATMOSPHERE

Installation of a ventilation or heat recovery system requires fresh air and exhaust air to be vented to atmosphere. This normally takes place through the roof. Because of the number of options, we do not stock tile vents, cowls, ridge vents etc.

We can suggest, however, the following suppliers who should be able to fulfil the requirements.

**Ubbink (UK) Ltd**  
Borough Road  
Brackley  
Northants  
NN13 7TB
