Suction Power (mm H <sub>2</sub> O)	2478	2478
Input Power (watts)	1560	1560
ECS Motor	-	-
Motor & size (ins)	5.1	5.1
Sound level (dB)	66	66
Height x Diameter (mm)	495 X 327	603 X 325
Weight		
LCD display	N	N
Dust Bag (litres)	17	23
Utility Inlet	N	N
Self cleaning filter	N	N
Dual intake	N	N
Exhaust Muffler	Y	Y

These units feature a powerful high airwatt 5.1 single stage through flow motor with sealed paper bag filtration. They are small but powerful, suitable for small homes or apartments. The replaceable dust bag has an inner lining which gives additional strength for a longer life and also serves as an electrostatic barrier. The unit is constructed from rolled galvanized steel and is powder coated for a corrosion resistant lifetime of use.

Airwatts	1268
Suction Power (mm H <sub>2</sub> O)	3480
Input Power (watts)	3.94
ECS Motor	-
Motor & size (ins)	7.2 x 2
Sound level (dB)	78
Height x Diameter (mm)	514 X 375
Weight	
LCD display	N
Dust Canister (litres)	43
Utility Inlet	N
Self cleaning filter	Y
Dual intake	N
Exhaust Muffler	Y

<b>Separator</b>
1022 X 410

The VacuMaid® split canisters are the most unique central vacuum on the market. With the power unit separate from the dirt canister you can place the two in separate locations. It is best that the power unit be placed in a remote location to further reduce any motor noise and place the dirt canister where it is easily accessible. These units use ultra long life motors for superior performance.

Split canister systems are especially good for people with pets. With the split system most of the hair is collected in the bottom can, but some may make its way to the top screen. This screen can easily be cleaned by removing the top lid and wiping away the hair. With bag systems hair from pets will easily clog the bag reducing its performance and cleaning ability. The bottom cans feature a plastic liner for clean and easy emptying.
